Help

Help will inform the user how to acquire the Access Code
Logic is required to associate the new account with the primary account so an access code can be delivered. May need to for a user account to the Smart Home account via an MDN.
Error handling for non Verizon MDN's will need created.

Applying Router Settings
Please wait...

Router should support automatic reconnection to Wi-Fi using the new credentials. Eliminating the need for the user to search for the new network and connect - forgetting the prior connection.
Restore router function will be moved in to the app but still be available in Web setup.

Connect Smart Devices
Place your smart devices so your router can find them.

Getting Started
Welcome to your new VoLTE Home Phone Plus.
To get the most out of your router choose the option that's right for you ...

○ I'd like to setup and personalize my router and Smart Home. (Recommended)
○ Just take me to the internet. (This option maintains default router settings and passwords)
○ Restore from a system backup.

☑ I accept the Terms & Conditions.
